Professional Summary

Motivated Computer Engineering student pursuing a B.Tech degree, with hands-on backend development experience using Java, Spring Boot, Hibernate, and MySQL. Skilled in building RESTful APIs, secure authentication, database integration, and performance-focused solutions, with working knowledge of JavaScript, Python, Git, and Azure. Strong communicator and team contributor with a practical approach to problem-solving and software development.

Skills

- **Languages:** Java, JavaScript, Python
- **Frontend:** HTML5, CSS3, Tailwind CSS, React
- **Backend:** Spring Boot, Spring Security, Hibernate
- **Databases:** MySQL, MongoDB, DBMS
- **Tools:** Git, GitHub, Firebase, Postman, Swagger, Microsoft Azure
- **Soft Skills:** Teamwork, Communication, Problem Solving, Adaptability
- **Core Competencies:** Programming, Software Development, Object-Oriented Programming

Experience

Muster Dekho | Backend Developer Intern

May 2025 - Oct 2025

- Applied object-oriented programming principles to develop RESTful APIs using Spring Boot
- Supported software development by integrating MySQL databases with Hibernate ORM
- Implemented secure authentication using Spring Security and JWT while applying problem-solving skills to optimize database queries and improve application performance
- Optimized database queries to improve application performance

Desire4Travel | Campus Ambassador

- Represented the brand on campus, coordinated outreach activities, and strengthened communication and teamwork skills
- Assisted in promotions and peer engagement
- Developed leadership, communication, and organizational skills

PROJECTS

Blogging Application – Backend API

- Technologies: Java 21, Spring Boot, Spring Security, JWT, MySQL, Hibernate
- Built a secure and scalable back-end application using Java 21, Spring Boot, and object-oriented programming principles.
- Implemented JWT-based authentication and authorization with Spring Security for user registration and login.
- Developed RESTful APIs with MySQL and Hibernate ORM to support reliable data management for the blogging platform.
- Secured user passwords using BCrypt encryption to follow industry security standards.
- Tested and documented APIs using Postman and Swagger for better maintainability and collaboration.

Web Hosting Platform (Team Project)

- Technologies: HTML, CSS, JavaScript, Bootstrap, React, Angular, MongoDB
- Collaborated on a team to develop a responsive web hosting platform using modern frontend technologies.
- Implemented dynamic user interfaces with React, Angular, and JavaScript for smooth user interaction.
- Integrated MongoDB, a NoSQL database, for efficient storage and management of user and service data.

EDUCATION

Priyadarshini College of Engineering, Nagpur

Bachelor of Technology, Computer Engineering (GPA: 6.59)

Nov 2022 - Jun 2026

Nagpur

Vidya Niketan Junior College, Gondia

Higher Secondary Certificate (HSC) (GPA: 72.67%)

Aug 2020 - Jun 2022

Gondia

Vidya Niketan High School, Amgaon

Secondary School Certificate (SSC) (GPA: 81.83%)

Jun 2019 - Mar 2022

Amgaon

Achievements

- Participated in SMART INDIA HACKATHON - Qualified in college level.
- Participated in street plays and theatre activities to motivate people and develop strong team collaboration skills.
- Active member in Distributor Marketing for 2 years.
- Worked in Event Management in academics to develop Leadership, Team Work and Management skills.
